About the Seminar: The seminar “Wetlands of India; Importance and Challenges” was organized to **celebrate the World Wetlands Day**. Wetlands support large amounts of biodiversity but in the present scenario the wetlands are facing continuous threat of extinction. They need to be protected for the future. The main motive of celebrating the day is to create awareness among students about the wetlands of India, Ramsar’s Sites in India, their importance, criteria for designating any wetland as Ramsar sites and Challenges before the government for maintaining and conserving the wetlands. Students understood all the important above-mentioned facts about the wetlands with the help of a very beautiful and insightful presentation delivered by Prof. Sanjeev Aggarwal, Limnologist and Additional Director, CPCB, New Delhi.
