About the Institution

Swami Shraddhanand College is one of the premier institutions of higher education in the University of Delhi, located in the rural suburbs of the city. From the humble beginning in the Gandhi Ashram building in Narela, the College has completed 54 years of its existence. It is equipped with qualified teaching staff, specialized laboratories, computerized library facilities and extensive playgrounds. The College has been re-affirming its commitment to provide quality education to the student community.

Shiksha Sanskriti Utthan Nyas

Shiksha Sanskriti Utthan Nyas is a trust working in the field of education and culture in India. It was established on 18 May 2007 by Sh. Dinanath Batra who is a former Pracharak of Rashtriya Swayamsevak Sangh and former Director of Vidya Bharati. This trust works in close collaboration with its partner organizations such as the Shiksha Bachao Andolan Samiti. The stated goal of this trust is to establish an alternative system to the existing education system. To achieve this goal, this institution considers it necessary to change the curriculum, system, method and policy of education and 'Indianisation' of education

Aims and Objectives of Seminar

It is well-established that no society can thrive without connecting to its roots. The rich and diverse Indian knowledge systems symbolize the country's identity and their role in attaining self-reliance. The aim of this seminar is to highlight the roadmap of 21st century laid down by National Education Policy, 2020 wherein the top priority is recreate our traditional knowledge, to synergize it with art, culture and language and to provide solutions to many contemporary challenges through traditional knowledge systems.

Concept Note

The Indian knowledge system reflects a scientific system with its own validity. It is better adapted to the unique local conditions than their 'modern' variants. Indian contributions to global science, especially in the fields of agricultural biodiversity, coastal and marine ecosystems, eco-tourism, mathematics, linguistics, astronomy, metallurgy, civil engineering, and medicine are well documented in history. However, colonizers systematically degraded, destroyed, or damaged local traditional science, technology, and crafts of the lands. Thus, the traditional knowledge systems must be studied, preserved, and revived in a holistic manner for overall improvement of the human being. This ancient wisdom allows for a sustainable growth without affecting the environment. The vision of NEP is to develop knowledge, skills, values and dispositions that support responsible commitment to human rights, sustainable development and global well-being, thereby reflecting a truly global citizen.
